AjaxSearch Test - CORRECTED Credentials

Step 1: Database Connection Test

Host: localhost
Username: xbczjgmawe
Password: ********
Database: xbczjgmawe

✅ DATABASE CONNECTION SUCCESSFUL!

MySQL Version: 10.5.29-MariaDB-deb11-log
Connected to: xbczjgmawe
As user: xbczjgmawe@localhost

Step 2: List All Database Tables

Total tables: 186

```
- of9kt_action_log_config
- of9kt_action_logs
- of9kt_action_logs_extensions
- of9kt_action_logs_users
- of9kt_ajaxsearch_analytics
- of9kt_ajaxsearch_cache
- of9kt_ajaxsearch_config
- of9kt_ajaxsearch_sp_cache
- of9kt_akeeba_common
- of9kt_akeebabackup_backups
- of9kt_akeebabackup_profiles
- of9kt_akeebabackup_storage
- of9kt_assets
- of9kt_associations
- of9kt_authorarchive_bookmarks
- of9kt_banner_clients
- of9kt_banner_tracks
- of9kt_banners
- of9kt_categories
- of9kt_conditions
- of9kt_conditions_groups
```

Step 3: Detect Joomla Table Prefix

Detected prefix: **of9kt_** (used on 186 tables)

Step 4: Check AjaxSearch Tables

of9kt_ajaxsearch_cache: ✅ Exists
of9kt_ajaxsearch_sp_cache: ✅ Exists
of9kt_ajaxsearch_analytics: ✅ Exists
of9kt_ajaxsearch_config: ✅ Exists

Data in AjaxSearch Tables:

of9kt_ajaxsearch_cache:

Rows: 0

of9kt_ajaxsearch_sp_cache:

Rows: 0

of9kt_ajaxsearch_analytics:

Rows: 0

of9kt_ajaxsearch_config:

Rows: 9
Columns: id, param_name, param_value, param_type, component

```
Array
(
    [0] => Array
        (
            [id] => 1
            [param_name] => cache_ttl
            [param_value] => 300
            [param_type] => int
            [component] => global
        )
```

Step 5: Check AjaxSearch Component Installation

⚠ AjaxSearch component not found in extensions table

Step 6: Check for Component Files

✅ Found component at:
/home/1208205.cloudwaysapps.com/xbczjgmawe/public_html/components/com_ajaxsearch

Files in component directory:

```
📄 find_paths.php
📄 simple_test.php
📁 src
```

Step 7: Test Basic Search Functionality

❌ Error reading cache table: SQLSTATE[42S22]: Column not found: 1054 Unknown column 'query' in 'field list'
Analytics entries: 0

Step 8: Test Content Search

Total articles: 236
Published articles: 36
No articles found containing 'article'

Step 9: Final Summary

✅ **Database Connection: SUCCESS**

Using CORRECTED credentials
Database: xbczjgmawe
Prefix: of9kt_
Total tables: 186

AjaxSearch Status:

Tables found: 4 of 4
Component files: ✅ Found

Next Steps:

1. ✅ All AjaxSearch tables exist
2. ✅ Component files exist
3. Test the search functionality
4. Create your test_version.php using these database credentials

---

Test completed at: 2026-01-09 12:51:36

Sample Code for Your test_version.php:

```php
<?php
// Database configuration
$host = 'localhost';
$dbname = 'xbczjgmawe';
$username = 'xbczjgmawe';
$password = '6sngBS5S6J';
$prefix = 'of9kt_';

try {
$pdo = new PDO(
"mysql:host=$host;dbname=$dbname;charset=utf8mb4",
$username,
$password,
[PDO::ATTR_ERRMODE => PDO::ERRMODE_EXCEPTION]
);
echo "✅ Database connected successfully\n";
// Your test code here...
} catch (PDOException $e) {
die("❌ Connection failed: " . $e->getMessage());
```

```
    }
?>
```

⚠ **SECURITY WARNING:** Delete this test file after use!
